## QUALIFICATION INFORMATION

### GENERAL INFORMATION

**History:** Safe-T Security Service was founded over 25 years ago providing quality services with quality easy-to-use products at an affordable price. We provide design, engineering, sales & installation of both security systems and audio video systems for both commercial & residential markets. Although the ultimate goal is to fulfill the needs and/or desires of the client, we also understand what it takes to be a team member and play nicely with others, to minimize change orders and to maintain timelines, to be neat, presentable & maintain a clean work area, and to stay in communication with all parties involved... In essence, to keep everyone happy!

**Contractor's License:** # ACO6160

**Insurance:** Fully licensed and insured. Coverage includes general liability, workers' compensation, and auto insurance.

**Regions Served:** Orange, Los Angeles & Riverside counties & surrounding areas.

**Showroom:** Safe-T Security's showroom is located in its office in Riverside California. This is a functional lifestyle oriented showroom showcasing working demonstrations for audio video sources and display, control & automation, camera integration, touch screens and remotes, distributed audio with intercom capabilities, and structured wiring.

## **PROJECT INFORMATION**

**RESIDENTIAL:** Safe-T Security provides services for new construction (production and custom builders) and remodels from prewire rough-in phase to retrofits. Basic security services (alarm, monitoring, and security cameras, to audio video needs including prewire, distributed audio and video, home theater, lighting control, and system integration with touch screens, keypads, and hand held system remotes.

**COMMERCIAL:** Safe-T Security provides services for new construction needs including retail environments, offices, warehouses, houses of worship, and government facilities from basic security services (alarm systems, alarm monitoring, and security cameras) to audio video needs including prewire, distributed audio and video, lighting control, and system integration with touch-panels, keypads, and hand held system remotes.
